Mehdipatnam, Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student (CGPA: 9.15) specializing in Machine Learning, Deep Learning, and Generative AI. Experienced in building and deploying end-to-end ML solutions, including a live Malicious URL Detection system deployed on Render achieving 95%+ accuracy and Generative AI applications such as text-to-image generation. Published research in Deep Learning (YOLOv8) and recognized for technical excellence with 3rd place at IGNITE HACK 2024. Strong hands-on expertise in Python, TensorFlow, Flask, data preprocessing, feature engineering, model optimization, REST APIs, and cloud deployment, with proven leadership in large tech communities.

EDUCATION

Lords Institute of Engineering & Technology <i>Bachelor of Engineering in Computer Science and Engineering — CGPA: 9.15/10</i>	Hyderabad, India Nov 2022 – May 2026
Goutami Junior College <i>Intermediate (PCM) — Percentage: 84%</i>	Adilabad, India 2020 – 2022
Little Flower English High School <i>SSC (10th Grade) — GPA: 9.2/10</i>	Adilabad, India 2010 – 2020

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, SQL, HTML, CSS
Machine Learning & AI: Machine Learning, Deep Learning, Generative AI, CNNs, Transfer Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Data Preprocessing, Exploratory Data Analysis
Frameworks & Libraries: Flask, TensorFlow, Scikit-learn, NumPy, Pandas, Tkinter, Java Swing
Tools & Platforms: Git/GitHub, Cloud Deployment (Render), REST APIs, MySQL, Model Deployment
Core Competencies: Algorithm Design, End-to-End ML Pipeline Development, Backend Development, Problem Solving

PROJECTS

- Malicious URL Detection Web Application** | *Python, Flask, ML, Cloud Deployment* | [Link](#) 2025
- Developed and deployed production-ready web application detecting malicious URLs with 95%+ accuracy using ML classifiers
 - Implemented feature extraction pipeline analyzing URL patterns, domain characteristics, and behavioral indicators
 - Built RESTful API with Flask backend and deployed on Render cloud platform for real-time threat detection
 - Designed user-friendly interface enabling instant URL safety verification with detailed classification reports
- Text-to-Image Generation using Stable Diffusion** | *Python, Generative AI, Web Development* 2024
- Developed Generative AI web application converting text prompts into high-quality images using Stable Diffusion model
 - Optimized image generation pipeline reducing latency by 40% through efficient preprocessing and caching mechanisms
 - Secured 3rd place at IGNITE HACK 2024 among 50+ competing teams, demonstrating innovation and technical excellence
- Image Classification using Deep Learning** | *Python, TensorFlow, CNN* 2024
- Built convolutional neural network achieving 92% accuracy on multi-class image classification task
 - Implemented data augmentation and transfer learning techniques improving model generalization and performance
 - Developed complete ML pipeline including data preprocessing, model training, evaluation, and hyperparameter tuning
- Online Mock Test Application** | *Java, Java Swing, Database Integration* 2024
- Built full-stack application with automated grading system and real-time analytics during HACKPRIX Hackathon
 - Integrated database of 500+ previous year papers with intelligent question randomization and timer functionality
- YouTube Video Downloader** | *Python, Tkinter, API Integration* 2024
- Created desktop application supporting multi-quality downloads (1080p, 720p, 360p) with progress tracking and error handling

EXPERIENCE & LEADERSHIP

AI & Machine Learning Intern <i>Edunet Foundation</i>	Nov 2024 – Dec 2024 <i>Remote</i>
• Developed ML model for image classification using Python, TensorFlow, and scikit-learn under expert mentorship • Gained hands-on experience in model development, training, evaluation, and deployment workflows • Worked on real-world datasets applying data preprocessing and feature engineering techniques	
Internshala Student Partner <i>Internshala</i>	Oct 2024 – Dec 2024 <i>Remote</i>
• Promoted internship and training opportunities, successfully engaging 500+ students in career development initiatives • Demonstrated leadership and communication skills through strategic outreach and community building	
Campus Ambassador (Silver Award) <i>LetsUpgrade</i>	Jun 2024 – Aug 2024 <i>Remote</i>
• Built and managed tech community of 1000+ learners through strategic outreach and educational content curation • Achieved Silver Award milestone by exceeding engagement targets and organizing skill development workshops	

RESEARCH & ACHIEVEMENTS

Research Publication: Presented "Segmenting Brain Tumor Detection Instances in Medical Imaging with YOLOv8" at 9th International Conference on Research in Intelligent Computing in Engineering (RICE 2024)	
3rd Place - IGNITE HACK 2024: Secured top position with AI-powered Text-to-Image Generation project among 50+ teams	
3rd Prize - Project Expo, SPARK 2.0 (2025): Recognized for innovative ML application development	
Google Cloud Arcade Facilitator (2024): Completed milestone achievements in cloud computing	
HackQuest Winner: Won Web3 Programming competition demonstrating blockchain expertise	
Academic Excellence: Maintained 9.15/10 CGPA with consistent performance across all semesters	

CERTIFICATIONS

Computer Networks - NPTEL (12-week certification)
Career Essentials in Generative AI - Microsoft & LinkedIn
Advanced Data Science and Artificial Intelligence - YBI Foundation
Data Science & Machine Learning - YBI Foundation
Operating Systems Certificate - Scalar Academy
Generative AI - Microsoft Copilot & LinkedIn Learning
