Mehdipatnam, Hyderabad, Telangana, India

## Professional Summary

Results-driven Computer Science Engineering student (CGPA: 9.15/10) specializing in Machine Learning, Deep Learning, and Generative AI. Experienced in building and deploying end-to-end AI solutions including HeuriGuard, an AI-powered malicious URL detection platform deployed on cloud infrastructure. Published research in Deep Learning (YOLOv8) and recognized for technical excellence with 3rd place at IGNITE HACK 2024. Strong expertise in Python, TensorFlow, Flask, REST APIs, data preprocessing, feature engineering, and cloud deployment.

## Education

**Lords Institute of Engineering & Technology**  
Bachelor of Engineering in Computer Science  
CGPA: 9.15/10

Hyderabad, India  
Nov 2022 – May 2026

**Goutami Junior College**  
Intermediate (PCM)  
Percentage: 84%

Adilabad, India  
2020 – 2022

**Little Flower English High School**  
SSC  
GPA: 9.2/10

Adilabad, India  
2010 – 2020

## Technical Skills

**Programming:** Python, Java, C, JavaScript, SQL

**Machine Learning & AI:** Machine Learning, Deep Learning, Generative AI, Feature Engineering, Hyperparameter Tuning, Data Preprocessing, Model Evaluation, Exploratory Data Analysis

**Frameworks & Libraries:** TensorFlow, Scikit-learn, Flask, NumPy, Pandas, Tkinter, Java Swing

**Tools & Platforms:** Git, GitHub, MySQL, REST APIs, Cloud Deployment (Render, Vercel)

## Projects

**Personal Developer Portfolio – mdjaveedkhan.me**

2026

HTML, CSS, JavaScript

- Designed responsive personal portfolio website showcasing projects, research, and achievements.
- Implemented modern UI with optimized performance and cross-device compatibility.
- Deployed using custom domain for professional online presence.
- Live Portfolio: <https://mdjaveedkhan.me>

**HeuriGuard – AI Powered URL Security Platform (Major Project)**

2025-2026

Python, Machine Learning, Flask, Cloud Deployment

- Developed AI-powered web application to detect malicious URLs using machine learning algorithms.
- Built real-time detection system with Flask backend and deployed on cloud infrastructure.
- Implemented advanced feature extraction analyzing lexical patterns and domain indicators.
- Designed user-friendly interface for instant URL security verification.
- Live HeuriGuard : <https://heuriguard.mdjaveedkhan.me>

**Malicious URL Detection using Machine Learning Techniques**

2025

Python, Scikit-learn, Data Analysis

- Built machine learning model achieving 95%+ accuracy for detecting phishing and malicious URLs.
- Implemented feature engineering techniques analyzing URL structure and suspicious tokens.
- Evaluated multiple ML algorithms including Logistic Regression and Random Forest.

**Text-to-Image Generation using Stable Diffusion**

2024

Python, Generative AI

- Developed Generative AI application converting text prompts into high-quality images.
- Optimized inference pipeline improving image generation speed and performance.
- Secured 3rd place at IGNITE HACK 2024 among 50+ teams.

## Online Mock Test Application

2024

Java, Java Swing, Database Integration

- Developed desktop-based exam system with automated evaluation and timer functionality.
- Integrated database containing 500+ previous year exam questions.
- Implemented random question generation and performance tracking features.

## Experience

---

### AI & Machine Learning Intern

Nov 2024 – Dec 2024

Edunet Foundation (Remote)

- Developed machine learning models using Python, TensorFlow, and Scikit-learn.
- Applied data preprocessing and feature engineering techniques on real-world datasets.
- Evaluated model performance using accuracy, precision, recall, and F1-score.

### Internshala Student Partner

Oct 2024 – Dec 2024

- Promoted internship programs and engaged 500+ students in career initiatives.
- Organized awareness campaigns for skill development opportunities.

### Campus Ambassador (Silver Award)

Jun 2024 – Aug 2024

LetsUpgrade

- Built and managed tech community of 1000+ learners.
- Organized workshops and educational content sessions.

## Research & Achievements

---

- Research Publication: "Segmenting Brain Tumor Detection Instances in Medical Imaging with YOLOv8" – RICE 2024 International Conference. ( [Link](#) )
- 3rd Place – IGNITE HACK 2024. ( [Link](#) )
- 3rd Prize – Project Expo SPARK 2.0 (2025).
- Google Cloud Arcade Facilitator (2024).
- HackQuest Winner – Web3 Programming Competition.

## Certifications

---

- Computer Networks – NPTEL (12 Week Certification) ( [Link](#) )
- Career Essentials in Generative AI – Microsoft & LinkedIn
- Advanced Data Science and Artificial Intelligence – YBI Foundation
- Data Science & Machine Learning – YBI Foundation
- Generative AI – Microsoft Copilot & LinkedIn Learning
- Artificial Intelligence Program – School of AI ( [Link](#) )
